

I find it interesting that of the 18 member Health Benefits Advisory Committee who will make the ultimate decision on what treatments are approve/non-approved, only one is to be "a practicing physician or other health professional" (see pg. 32).

This is why it's so important for the bills to be read!

Page 16 specifies that those uninsured as of Jan 1 MUST go to the government plan (they cannot choose a private insurance plan), those with insurance Jan 1 can keep what they have but may never change to another private insurer, only can change to the government plan, those who may leave their employer for self employment cannot choose a private plan but only the government plan.

End result...elimination of the private insurance options and forced participation in the government plan.

Obama's own words stated that his goal is to move to a single, government-run, payer plan.

Here is a listing of points of interest in the House Healthcare proposal.. the one which we were not supposed to read prior to their voting on it. I like the parts where they have not allowed Judicial Review.. e.g., suing the government.
